EXOS AEROSPACE — SSLC OPTION B: ACQUISITION OFFER SUMMARY

October 7, 2026 · Exos Aerospace Systems & Technologies, Inc.

1. What SSLC Holders Receive

The Exos offer delivers liquidity, debt relief, and equity upside — without requiring any additional capital call from current SSLC shareholders.

The up-front price reflects what the numbers support today. The earn-outs are how that value grows: as IM tank deliveries and the Exos listing happen, SSLC holders share directly in that upside.

Component	Low	Base	High	When / Notes
Cash at close	$2,510K	$2,510K	$2,510K	Close ~Q1 FY27
SSLC transaction costs	$60K	$60K	$60K	Close; seller-side
Credit for Exos's existing stake	$790K	$790K	$790K	Close (non-cash credit)
SSLC debts paid at face	$500K	$500K	$500K	Close; ~$500K TBV in QB
Working-capital bridge	—	$500K	$500K	Close; only if it remains after prepaid removal
Subtotal: funding at close	**$3,860K**	**$4,360K**	**$4,360K**	
Tank earn-out (3 yrs, capped)	—	$750K	$900K	FY27–FY29; 5%/yr; cap $300K/yr
Exos stock earn-out at listing	$1,000K	$1,875K	$3,000K	Post-RTO ~FY28; 0.5% / 0.75% / 1.0% FD
TOTAL OFFER VALUE (5-yr)	**$4,860K**	**$6,985K**	**$8,260K**	**FY27–FY31**
Memo: Exos stock if held to FY31 (not additive to total above)	*$5.7M*	*$8.5M*	*$11.4M*	*16× EV/EBITDA; ~30% dilution; mgmt assumption — not a guarantee*

- **No additional capital calls** Once closed, SSLC's standalone cash burn stops entirely.
- **IM program continuity** Exos-SSLC continues the Intuitive Machines contract with no delivery interruption.

2. Why the Growth Trajectory Requires Exos Capital

The bottleneck is not the technology or the IM demand — it is working capital. SSLC's most recent quarter (FY27 Q1) came in at $713K in revenue. Hitting $5M for FY27 requires averaging $1.43M per quarter in Q2–Q4 — exactly 2.0× that pace — starting immediately. That doubling is not achievable on SSLC's current $198K cash balance.

Standalone constraints (SSLC's own numbers):

- **Cash position** $198K at October 2, 2026 — roughly one month of operating burn.
- **Working capital gap** $300K–$700K needed to maintain delivery commitments and service new IM orders — before SSLC can ramp to the $5M/year run rate.
- **Operating history** FY26 operating loss: −$416K. No self-funding path to production scale.
- **He-tank rework** Rev3 GHe tank 4,400 psi proof issue unresolved (MC #3056). Remediation cost ~$175K to COPV ($300K gap). Resolves cleanly as intercompany under Exos.
- **No capex capacity** Production-scale equipment and headcount additions are not fundable from SSLC's cash position. Growth is capped at current run-rate without outside capital.

The With-vs-Without comparison, year-by-year CAGR figures, and cumulative revenue gap are in the model spreadsheet: EXOS_SSLC_OptionB_Acquisition_Model_2026-10-07.xlsx, sheet 'With vs Without Exos Capital'.

3. Total Compensation — 5-Year View (FY27–FY31)

Stacked chart below: funding delivered at close + earn-out forward potential. Base scenario shown; earn-out range (low/high) is in the model.
