MEETING BRIEF — TIM FRANTA / STARFIGHTERS SPACE

Jon Quinn | Late October 2026 | INTERNAL — NOT FOR DISTRIBUTION

WHO YOU'RE MEETING

Name: Tim Franta — CEO, Starfighters Space, Inc.

Email: tfranta@starfightersspace.com

Company: NYSE American: FJET — Cape Canaveral, FL

Context: 23+ emails; MOU under discussion (Task #1782); mutual NDA in place; AEDC Velocity Alliance co-teaming

FJET today: Stock $1.62 | Market cap ≈$90M | Down 86% from 52-wk high $31.50 | Going concern active | Cash burn ≈$10M/H1

MEETING OBJECTIVE

Advance Starfighters from teaming partner to capital and commercial partner. Confirm one concrete next step before leaving the room.

YOUR ASKS (RANKED)

- **Ask 1 (Priority):** JV / Teaming Agreement signed: formalize MOU into binding agreement — revenue share + mutual warrants. 30–60 day close. Supports AEDC, AFRL, NASA pursuits jointly.
- **Ask 2 (Secondary):** Strategic equity investment in Exos: $5M–$10M at 409A valuation ($169.7M pre-money), subject to applicable securities exemptions and Counsel review (504 capacity limited; separate accredited-investor offering may be required — Counsel to confirm before raising). FJET board approval required. Timeline: 6–10 weeks once structure confirmed.
- **Ask 3 (Fallback):** Launch-slot prepayment: $2M–$5M commercial deposit against future BLK3 flights, with warrants. Easiest entry if equity timeline is slow.

WALK-AWAY LINES

- No deal that doesn't include Ask 1 (teaming) as the minimum outcome.
- No valuation of Exos below the March 31, 2026 409A ($169.7M pre-money).
- No merger / acquisition / reverse-merger discussion until Ainigma exclusivity cleared by Counsel AND FJET stock is stable above $2.00.
- Do not reference Scorpius acquisition, ROFR, or any Scorpius ownership change.
- Do not commit to a specific BLK3 flight date — use 'early 2027.'

QUESTIONS TO ASK TIM

- What is Starfighters' current capital runway and any active fundraise timing?
- Is the FJET board aligned on strategic investments vs. deploying all capital on STARLAUNCH ops?
- What is FJET's priority customer: DoD captive-carry, commercial space, or orbital launch?
- What is Tim's view on the Blackstar Orbital partnership vs. what Exos brings?
- Has Cantor Fitzgerald (May 2026 placement agent) discussed any follow-on raise?

Aerospace
Systems & Technologies

• Is the AEDC Velocity Alliance RFWP fully submitted with Exos on the roster?

KEY POSITIONING POINTS

• Exos = one of three FAA-licensed reusable rocket providers. BLK3 FAA-licensed (Mar 2026), first commercial flight early 2027.

• Exos + Starfighters = commercial test ladder from Mach 2 to 85+ km. No single competitor covers this range.

• SpaceX IPO repriced the sector — non-SpaceX space infrastructure is the buy, per same narrative FJET uses.

• BLK3: 135 kg, above 85 km, reusable — complements STARLAUNCH for different payload classes and altitudes.
