SSLC commission economics [NEW]	Commission on Exos-sold SSLC tanks: FY27 $0 · FY28 $37.5K · FY29 $75K · FY30 $113K · FY31 $150K. Rebate on SSLC tanks Exos buys (contra cost of sales): FY27 $68.1K · FY28 $90K · FY29 $135K · FY30 $180K · FY31 $225K. Total: FY27 $68.1K · FY28 $128K · FY29 $210K · FY30 $293K · FY31 $375K.	15% rate; customer pays SSLC's own price (no markup). Upside if Exos books the full IM tank book is NOT in the base case.

Scorpius (SSLC) [CHANGED]	Exos holds 18% passive equity in SSLC (carried at cost). SSLC is Exos's Type-V tank supply partner and sales channel: Exos earns a 15% commission on SSLC tank hardware it sells, at SSLC's own price, and on SSLC sales to Exos (effective rebate). SSLC Type-5 tanks flew on IM-1 (2024) & IM-2 (2025).	Never say: acquisition of SSLC, ROFR, buying the 82%, consolidated/100% SSLC revenue, acquisition fairness opinion, manufacturing license as a dependency, or that Exos owns/manufactures the Type-V tank technology. Sales Commission Agreement in drafting.
Listing path	Private growth Series A now; TXSE-primary the dated, conditioned destination	Unchanged
Cap table	All common; David Mitchell 37% / John Quinn 21% / 5% pool	Unchanged
Core assets (of record) [CHANGED]	Four: (1) Integrated Pressurized Structures + the SSLC Type-V tank partnership (supply,	#1 no longer "Scorpius Type-5 cryo IP + 18%/ROFR".

	15% sales channel, 18% equity); (2) FAA-licensed reusable suborbital platform (BLK3); (3) RDRE / advanced-propulsion pipeline (USAF Phase II→III); (4) the AI-deployed operating platform	

Open items for Jon: (1) approve this sheet before the data-room .md is updated; (2) whether the 409A ($169.7M) needs a refresh now that the SSLC purchase option is no longer part of the strategy; (3) whether external docs may describe the commission terms before the Sales Commission Agreement is signed.
