Risk Rating Definition

Overall Risk Category	
Nil Rating	Lack of sufficient data to provide accurate rating (Financial Statements outdated or entity is dormant).
N Rating	Recently established company. Unable to provide credit risk rating due to lack of historical data.
X Rating	Entity that has ceased operations (Bankrupted, dissolved, under liquidation, under management control).
Low Risk	Indicates low credit risk and is assigned to companies of exceptional credit quality.
Average Risk	Indicates average credit risk and is assigned to companies of moderate credit quality.
Above Average Risk	Indicates increased credit risk and is assigned to companies of low credit quality.
High Risk	Indicates possibility of very high credit risk and is assigned to companies of very low credit quality.

Financial Risk

By analyzing the latest available Financial Statements that include the Balance Sheet, the Statement of Income (Profit and Loss Account) and the Cash Flow Statement and by comparing various key ratios, we can determine the Financial Risk Indicator of a company at a given point in time.
By acquiring the current, previous and average industry Financial Risk indicators you are able to evaluate the company's position compared to its previous rating as well as to the industry average.

Operational Risk

By taking into account the following factors, we are able to determine the Operational Risk Indicator of a company:

1. The related entities of the company, (i.e. whether it is part of a Group, its subsidiaries, parent or affiliated companies)
2. The operational environment in which the company is trading (i.e. political and socioeconomic risk of the country)
3. The negative trading history of the company and its related entities

Having also the company's previous Operational risk and the average industry Operational risk you are able to evaluate the companyâs position compared to its previous rating as well as to the industry average
